- Lacey FD
- Olympia FD
- East Olympia FD
- Thurston County Medic One
- Tumwater FD
- Olympic Ambulance
- SE Thurston FD
- South Thurston FD
- South Bay FD
- West Thurston Regional Fire Authority
- AMR

The role of the DMCC

Disaster Medical Coordination Center

The DMCC has one role, and one role only, during an MCI/disaster event:

Assist EMS with patient placement to the closest most appropriate facility, based on their injuries, the first time around in an attempt to prevent secondary transfers.

Regional receiving facility notification via 800 MHz

Hospital priorities prior to arrival of patients

- Initial alert for ED staff, hospital supervisors and AOC
- Rapid discharge of current ED patients
- Mobilization of OR teams, surgeons and anesthesiologists
- Request for supplies; additional staff as needed
- Set up of hospital incident command (HICS)

Receiving Facilities

*per WaTrac

Facility – Trauma Designation	Patients
Allenmore – Level IV	5
St. Joe’s – Level II	10
Capital Medical – Level IV	8
*Madigan – Level II	19
St. Peter – Level III	11
Tacoma General – Level II	3
Good Sam – Level III	13
Total	69

Lessons Learned

Communication, communication, communication....the dead zone

- *DMCCs*
 - Good Sam, St. Pete's & Madigan
- *EMS, 911 Dispatch*
 - Coordination of resources (ambulances, fire & police)
- *Civilian vs. Military response*
 - Adherence to regional disaster response plans
- *Hospital notification*
 - Multiple DMCCs activated, multiple patients per ambulance, scene chaos
- *Patient distribution*
 - Hospital bypass, resources available, coordination between DMCCs
